## DETAILED ACTION

### *Acknowledgment*

1. This Office Action is responsive to the Amendment filed on 04/15/2004.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) The invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 2, 3, 7 are rejected under 35 U.S.C. 102(e) as being anticipated by Ravikanth (US Patent No. 6,327,274).

Consider claims 2 and 7, Ravikanth discloses (figs. 1, 2), a method and a system for estimating (computing 204) network system jitter associated with transmitting of data packets,

computing a mean (average 208) jitter value after transmitting (arrival) of a plurality of packets, each of the packets having a time stamp which records time measured by the first clock jitter between delays, adjusting the clock stamped reference values based on system skew (jitter) (col. 2, lines 1-10, 30-41; col. 4, lines 1-3, 53-56).

Regarding claim 3, Ravikanth discloses calculating an estimated mean (average) jitter obtaining the timestamp of the one packet recorded at the first clock; computing a time delay between a time of transmitting the one packet and a time of receiving the one packet; computing a jitter between the time delay for the one packet and the time delay for a next packet consecutively transmitted after the one packet; averaging jitters after transmitting the plurality of packets; averaging inter-packet times, each of the inter-packet times being a time interval between transmitting two consecutive of the plurality of packets at the first network node; and determining the clock skew (col. 1, lines 66-67; col. 2, lines 1-10)

#### ***Allowable Subject Matter***

4. Claims 4-6, 8-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. Claims 11-18 allowed.

#### ***Response to Arguments***

6. Applicant's arguments with respect to claims 2, 3, 7 have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 2631

Rejections based on the newly cited reference(s) are highlighted above.

***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Scott (US Patent No. 6,665,317) is cited as art of reference showing jitter computation and management.

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
